Type: ROUTINE INSPECTION

Date: Aug-19-2009

JOPLIN, MO 64804

2.40 (b) (2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Sec. 2.40 Attending veterinarian and adequate veterinary care (dealers and exhibitors).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care;

There were expired medications in the kennel facility. The medications were: Oxytocin exp Feb 2009; Vitamin B Complex exp Dec 2008; Sulfa/Trime/Metro suspension exp March 2009; Loperamide Hydrochloride exp April 2009; Metronidazole tablets exp Mar 2009. The owner needs to keep medications that are not expired and safe for the animals for use in the kennel. This is necessary for the health of the animals

This affects 157 adult dogs

3.1 (c) (1) (ii) REPEAT

HOUSING FACILITIES, GENERAL.

Sec. 3.1 Housing facilities, general.

(c) Surfaces--

(1) General requirements.

(ii) Be free of jagged edges or sharp points that might injure the animals.

-The dividers on the lower level, west side of the south kennel building were broken loose from the bottom of the enclosure.

-The dividers on the upper level, east side of the south kennel building were broken loose from the bottom of the enclosure.

-The dividers on the upper level, west side of the south kennel building were broken loose from the bottom of the enclosure.

Inspection Report

-There were sharp wires in the first and and fifth pens from the east end.
-There were sharp wire sticking out into the enclosures on the upper level east side of the south kennel building. The dogs have been chewing and tearing up the wire in the enclosures. The owner needs to repair/replace the damaged wires in a manner that protects the animals from any injuries.
This affects 45 dogs

3.1 (c) (3)

HOUSING FACILITIES, GENERAL.

Sec. 3.1 Housing facilities, general

(c) Surfaces--(

(3) Cleaning. Hard surfaces with which the dogs or cats come in contact must be spot-cleaned daily and sanitized in accordance with Sec. 3.11(b) of this subpart to prevent accumulation of excreta and reduce disease hazards.

There is a buildup of hair, dust and debris on the hard surfaces of the indoor portion of the east kennel building. The owner has not been completely cleaning the interior of this building. The owner needs to completely clean the building and maintain the cleaning on a regular basis

This affects 54 dogs

To be corrected by 30 August 2009

3.4 (b)

OUTDOOR HOUSING FACILITIES.

Sec. 3.4 Outdoor housing facilities.

(b) Shelter from the elements. Outdoor facilities for dogs or cats must include one or more shelter structures that are accessible to each animal in each outdoor facility.

There were 12 dogs - mothers and puppies under the lean to roof of the east kennel building. The dogs do not have a shelter for the dogs. The owner needs to provide shelters for the animals for the health of the animals.

This affects 12 dogs

To be corrected by 22 August 2009

3.9 (b)

REPEAT

FEEDING.

Sec. 3.9 Feeding.

(b) Food receptacles...If the food receptacles are disposable, they must be discarded after one use. Self-feeders may be used for the feeding of dry food. If self-feeders are used, they must be kept clean and must be sanitized in accordance with Sec. 3.11(b) of this subpart.

There was caked feed dust on the inner lip of the red self feeders. This caked food can contaminate the remaining feed in the feeders. The owner needs to clean and sanitize the feeders as often as necessary or not to exceed every 14 days. This is necessary for the health of the animals.

This affects 8 dogs

2.40 (b) (2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Sec. 2.40 Attending veterinarian and adequate veterinary care (dealers and exhibitors).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care;

There are 3 medications Ivomec dilution; propylene glycol; and dectomax. These medications do not show expiration dates; dilution of dosage of the medication on them. The owner needs to ensure that all medications are properly labeled at all times

This affects 159 dogs to be corrected by 15 Dec 2008

3.1 (c) (1) (ii)

HOUSING FACILITIES, GENERAL.

Sec. 3.1 Housing facilities, general.

(c) Surfaces-

(1) General requirements.

(ii) Be free of jagged edges or sharp points that might injure the animals.

-There are sections of sharp wires in the floor of the west side of the south kennel.

-There is one divider panel on the south east side of the south kennel - 2nd from the south that has come loose at the bottom. This has made a gap of 1 to 2 inches that can trap the animals leg.

-There are 2 divider panels inside the south kennel. They are the 2nd and 3rd from the south end. These dividers have a gap at the bottom.

-There are sections of divider in the whelping building that the plastic dividers have cracked. These dividers have holes in them.

These sharp wires and gaps can cause injury to the animals. The owner needs to repair/replace the wire flooring and dividers in a manner that protects the animals from injury

This affects 7 dogs To be corrected by 20 Dec 2008

Inspection Report

3.1 (f)

HOUSING FACILITIES, GENERAL.

Sec. 3.1 Housing facilities, general.

(f) Drainage and waste disposal. Housing facility operators must provide for regular and frequent collection, removal, and disposal of animal and food wastes, bedding, debris, garbage, water, other fluids and wastes, and dead animals, in a manner that minimizes contamination and disease risks.

There is waste at the south end, west side and at the north end east side of the south kennel building. The waste has been washed out on to the ground. The owner needs to clean up the waste and repair/replace the wash downs in a manner that prevents the waste from flowing pout on to the ground. This is necessary for insect and disease prevention in the kennel.

This affects 159 dogs To be corrected by 20 Dec 2008

3.4 (b) (3)

OUTDOOR HOUSING FACILITIES.

Sec. 3.4 Outdoor housing facilities

(b) Shelter from the elements.

(3) Be provided with a wind break and rain break at the entrance

There are 3 enclosures in the outdoor portion of the facility that either do not have a wind/rain break or door at the entrance. The owner needs to repair/replace the door of the one enclosure and install wind/rain breaks at the entrances of 2 shelters. This is necessary to provide clean dry bedding for the animals

This affects 5 dogs To be corrected by 15 Dec 2008

3.9

FEEDING.

Sec. 3.9 Feeding.

If self-feeders are used, they must be kept clean and must be sanitized in accordance with Sec. 3.11(b) of this subpart. Measures must be taken to ensure that there is no molding, deterioration, and caking of feed.

-There are 18 feeders the metal lips are rusted

-There are 2 feeders in the south kennel one feeder has the corner chewed off allowing feed to flow out and the 2nd feeder has a hole at least 1 inch in diameter on the left side.

-The feeders in the whelping building do not have lids on them.

Inspection Report

The owner needs to repair/replace the feeders so that the animals are provided with wholesome feed.
This affects 67 dogs To be corrected by 15 Dec 2008

3.10

WATERING.

Sec. 3.10 Watering.

. Water receptacles must be kept clean and sanitized in accordance with Sec. 3.11(b) of this subpart, and before being used to water a different dog or cat or social grouping of dogs or cats.

-The water buckets in the outdoor portion of the kennel facility have a greenish growth in them. The owner needs to properly clean and sanitize the water bowls on a regular basis at a minimum of every 14 days or more often as necessary to provide potable water for the animals

This affects 30 dogs To be corrected by 15 Dec 2008
